Dear City Clerk,

On behalf of the Dioxin Education Committee (DEC), I am writing to follow up on the Formal Public Comment Submission we delivered prior to the Oroville City Council meeting on Tuesday, July 21, 2026, regarding Agenda Item #6 (**OroVerde Energy Initiative Update**).

In our submission, we requested public clarification regarding key aspects of the staff report (agenda packet pages 194–195), specifically:

1. The identities of the unnamed private "energy provider" and "project developer" evaluating the off-grid energy system concept.
2. The specific energy generation technologies (such as thermochemical gasification or thermolysis) proposed for these systems.
3. The specific greenfield locations being evaluated for development.
4. Environmental oversight and compliance under *Butte County General Plan 2040* environmental justice policies.

Could you please inform us whether City Staff or the City Council will be providing a written response or formal follow-up to address the questions submitted in our public comment?

If a formal written response is not standard practice following council updates, please let us know so we may submit a formal California Public Records Act (CPRA) request to obtain any relevant records and details.

Thank you for your time and guidance.

Sincerely,

[redacted]

Dioxin Education Committee (DEC)

Oroville, CA
